

INDEX

The author index is separate and precedes the title and subject index.

Reference is to the first three digits of the Dewey Decimal Classification number, or to the fiction, juvenile, or talking books sections (within which entries are arranged alphabetically by author).

Important divisions within the Dewey Decimal Classification are indexed in boldface type within the title index. Subject entries are intended to indicate the location of categories and do not refer to particular books.

These indexes are keyed to the current issue of Sci-Tech Book Profiles and Medical Book Profiles. The bracketed numbers (BP page numbers) following the Dewey Decimal Classification numbers may be used to locate sci-tech or medical books profiled in these publications.

AUTHOR INDEX
